1. Fungal infections are contagious and dangerous! Prevent them!
2. They affect hair, skin, and nails
3. Infection occurs:
4. Through direct contact between a sick and a healthy individual
5. Through contaminated objects: hats, combs, brushes, towels, bed sheets
6. Through contact with infected animals: cows, calf, cats, dogs, etc
7. Often, infection comes from women who do not see the infection in their hair
